Opportunity

CONNECTING YOUR BUSINESS TO THE HARDWARE TECHNOLOGY YOU NEED

As expenditures in the United States health care surpassed $2.3 trillion, Health information technology has a recognized role in our healthcare reform and enhancement. The benefit of integrating one solution for the end user in today's market is vital in quality assurance, cost reduction and faster diagnosis in our health care system.

Picture archiving and communication systems known as PACS is a new state of the art technology designed with enhanced patient care in mind.

The tool as powerful as PACS needs an ally, the only Five9 network system high end server that has the capability to meet needs of healthcare innermost arena.

We understand, health care centers whose primarily focus are on providing timely, high quality and cost effective health care, are in need of one solution to easily access the patient contents, their central asset of their organization.

Custom Solution

Five9 Network system family strives to combine your revolutionary system with our high end technical server to bring one solution and peace of mind to your client. We developed state of the art servers which are highly customizable tailored to the rigorous requirements that your customer desires. In Five9 Network system family, providing high performance system is just the beginning of our commitment to you. With our engineering support from experts in underlying technology, we layer our product with great customer focused service.

Product Offering

FIVE9 NETWORK SYSTEM PROVIDES A TOTAL END TO END SOLUTION.

Five9NS is a leading provider of high performance workstations for OEMs in the Healthcare equipment business that enables visual supercomputing utilizing leading edge graphics and GPU solutions from NVIDIA. This high end graphics enables quality images and reduce the possibility of taking the image again due to zooming or contrast issues. Consequently, saving time, reducing cost, decreasing wait time and eliminates constant exposure to harmful rays.

Choosing Five9 Network System to provide your system hardware ensures that there are no configuration or compatibility issues to delay your project, ensuring the smoothest possible implementation. Five9NS's compact desktop platforms are the perfect choice for OEMs looking for a low cost EMR appliance.

Call US

Our server enhances patient care by giving physicians and healthcare providers easy access to a snapshot of the patient history while reducing substantial cost, which the account management of your client would love and appreciate.
